

# PACIS 5

A technology demonstrator  
for the GOVSATCOM  
Secure Pooling & Sharing system

**PACIS 5 demo ongoing - from October 2018 to summer 2019.**

**2 customers already in:**

**1 commercial** - delivering services to French military forces  
in operations for recreational use

**1 governmental** - delivering services for civilian and  
military missions for professional needs

In partnership with

**Newtec**

**Dialog**

**AIRBUS**

# PACIS 5

The ESA logo is displayed in white, lowercase letters. It is positioned on the right side of the top banner, overlaid on a blue background featuring a stylized world map composed of white dots and connecting lines. The banner also includes images of a satellite launch and a ship's radar.

## By Joining the PACIS 5 demo, you will benefit from the following:

- Introduction of bursting capability to remote sites increasing available bandwidth for users
- Support of a wide range of applications and services on a single platform
- Dynamic bandwidth allocation and sharing between multiple sites
- Improved quality of service thanks to very high availability, state of the art traffic optimisation engine and advanced waveform technologies resilient to weather effects and interference
- Advanced features for secure communications

## ESA AND AIRBUS are preparing the future of secure satellite communication through laboratory developments of DIALOG system:

- Improving remote sites security thanks to obfuscation of critical information (GPS)
- Making system compatible with new generation satellites which will enable coverage changes upon service operators request
